Plasti-Bond® V-Seal® Gasket

The Plasti-Bond REDH₂OT® V-Seal® Gasket is the most effective way of preventing corrosion damage by sealing PVC coated Form 8 Conduit Bodies, sizes 1/2" to 2".

WANT MORE GOOD NEWS?

You won't have to pay more for the best available protection than you would for a standard fitting. It's all part of the unequaled value provided to you through Plasti-Bond REDH₂OT® PVC coated conduit, fittings and accessories.

- Our V-Seal® uses a special interlocking "V" groove... the best available method for protecting against corrosion.

COMPLIANCES

UL Listed Standard 514B
CSA Standard: C22.2 No. 18

- Plasti-Bond REDH₂OT conduit bodies with PVC-coated stainless steel covers are offered in Form 8 styles with numerous configurations to provide a complete coated conduit system. Available in 8 trade sizes from 1/2" through 2".
- 2 mil red urethane internal coating
- 40 mil gray PVC exterior coating.
- Sealing sleeves on all conduit openings.
- Plasti-Bond REDH₂OT conduit bodies may be used to make 90° bends, for pull outlets, to provide for taps or splices, to act as a mounting outlet for wiring devices or lighting fixtures.
- Form 8 style cover uses plastic encapsulated stainless steel screws with retainers built into covers for trade sizes 1/2" through 2".
- V-Seal® covers effectively seal out corrosive environments.
- Form 8 style fittings 1/2" - 2" have an integral V-Seal® gasket for superior corrosion protection.
- Electrical continuity of the conduit system is maintained across assembled joints.
